DocuMind AI: System Evaluation and Architecture Report

Author: Odysseus Group
Date: October 2026
Version: 1.0.0
Classification: Open Technical Documentation

---

1. Executive Overview

DocuMind AI is an open-source, local-first document intelligence platform engineered for privacy-conscious orga

Key capabilities demonstrated in this evaluation:
* Multi-format ingestion: Seamless parsing of PDF, Markdown, CSV, plain text, and source code.
* Multimodal Vision: Direct visual inspection and prompt analysis for rendered PDF page images.
* Context-Aware Chat: Vectorless contextual retrieval using page-level and chunk-level relevance.
* Offline Speech: High-fidelity voiceovers synthesized via Piper TTS ONNX models.

2. Security & Privacy Guarantees

In contrast to cloud-based document analyzers, DocuMind AI does not transmit raw document contents, extracte

3. Ingestion & Processing Benchmarks

Performance metrics observed during automated load testing across various document types:

Document Format	Typical File Size	Extracted Words	Mean Parse Latency
PDF (Text-dense)	1.2 MB	4,200 words	180 ms
PDF (Image-dense)	14.5 MB	1,850 words	620 ms
Markdown (.md)	45 KB	2,100 words	15 ms
CSV Data Table	120 KB	8,400 cells	40 ms
C++ Source Code	85 KB	1,600 LOC	35 ms

4. Mathematical & Algorithmic Presets

DocuMind AI provides specialized analysis presets tailored for mathematical and algorithmic documents. Formul

5. Conclusion & Recommendations

The architecture demonstrates that local consumer-grade hardware (NVIDIA RTX 30/40 series or Apple Silicon)
